

Pool and Spa Heatpumps

AFFORDABLE LUXURY

- LONGEST WARRANTIES IN THE MARKET.
- SAVE UP TO 80% COMPARED TO ELEMENT HEATING.
- EXTREMELY FAST HEATING.
- FANTASTIC TECHNICAL BACK UP.
- HEATS UP TO 40°C.

SPECIFICATIONS

SINGLE PHASE UP TO 14KW

Compressor	Mitsubishi, Toshiba or Sanyo
Condenser	Titanium in PVC
Evaporator	Hydrophilic aluminium/φ9.52 innergroove tube
Expansion Valve	Capillary
Controller	Single System Controller with Big LCD Monitor
Refrigerent Type	R410a
Power Supply V/Ph/Hz	220V/1Ph/50Hz
Quantity of Compressor	1
Compressor Type	Rotary

THREE PHASE FROM 21KW

Compressor	Sanyo
Condenser	Titanium in PVC
Evaporator	Hydrophilic aluminium/φ9.52 innergroove tube
Expansion Valve	Capillary
Controller	Single System Controller with Big LCD Monitor
Refrigerent Type	R410a
Power Supply V/Ph/Hz	220V/3Ph/50Hz
Quantity of Compressor	1
Compressor Type	Rotary

REAP THE BENEFITS OF SAVINGS

Usually heating a pool or spa 365 days a year can get expensive due to the fact that they are element based but by using a Firefly Heat Pump you will reduce your monthly water heating costs by up to 80%! Most people leave their spa's unused due to the electricity costs on running them. With our Heat Pumps you will get desired temperatures at affordable costs to support your luxury product. We cater for commercial, domestic swimming pools, as well as spa's!

Firefly Heat Pumps have possibly the highest co-efficiency or performance (COP) of above 5.0, meaning that for every 1kW electricity input, the pool will receive 5kW worth of efficient heating power.
